

 Scottish  
**Free School Meals**  
Campaign

“Free school meals should be part of our welfare provision for all children along with free education”

Dear Minister

I believe that the social, health, educational and economic case for the provision of free, nutritional school meals for all primary school children is clear. It is also clear that the public support for this proposal is wide-ranging and reflects the most progressive aspects of Scottish society.

I believe free school meals are the best way to ensure all our primary school children, regardless of their background or parental income, get at least one healthy and nutritious meal per day.

I welcome the Scottish Government's pilot programme for free school meals for children in primary 1 to 3.

I call on you and the Scottish Government to build on the pilot and roll out healthy free school meals to ALL primary 1 to 3 school children in Scotland.

Signed .....
